INSTALLATION INSTRUCTION
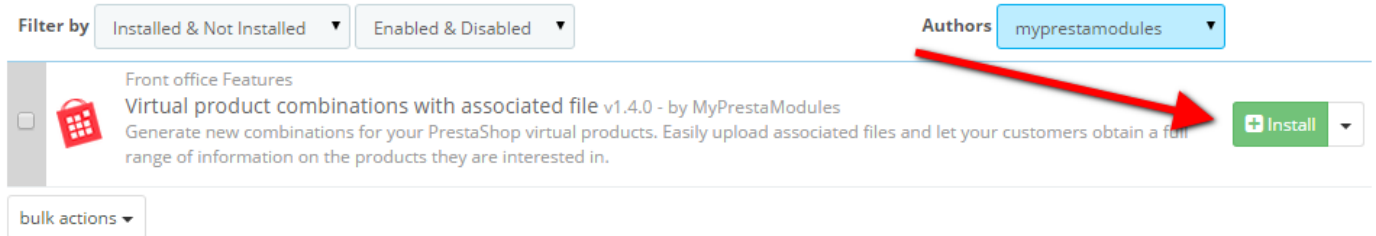

For installation this module you need to copy folder "`combinationsfile`" to your modules folder. For example "`www/modules/`". After copying the module go to the admin panel of your shop, select tab modules->modules, click on "`Front Office Features`" category. Where you will find module "`Virtual product combinations with associated file`", press install.

Then you need to make changes in the following files (before the changes we suggest you make copies of these files):

If your PrestaShop version < 1.6.0.13 Open the file in "`your store/js/admin-products.js`",

If your PrestaShop version >= 1.6.0.13 open the file in "`your store/js/admin/products.js`"

and looking for string

```
editProductAttribute (url, parent){
```

And after this row paste:

```
    if(typeof combinationsFile !=="undefined"){

      combinationsFile.fileUpload(url, id_product);

    }
```

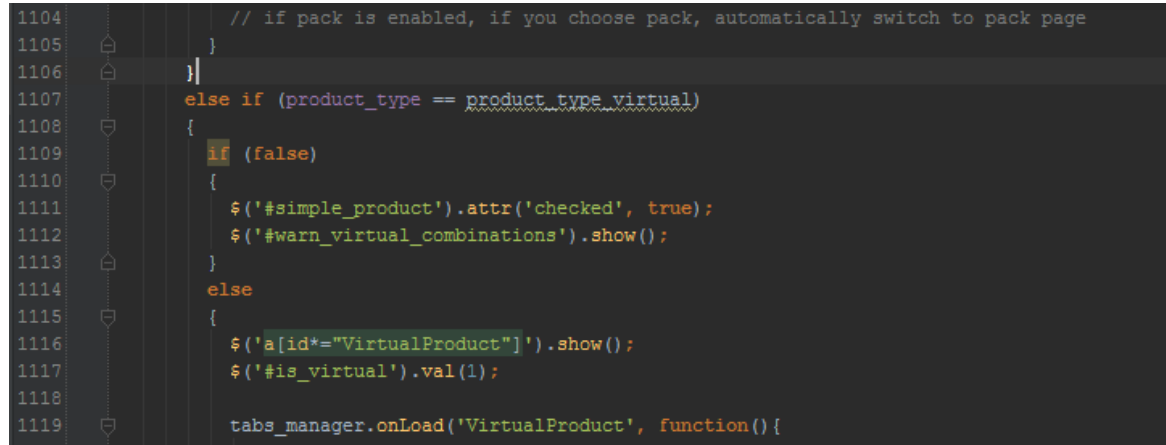

Look for the lines:

```
    else if (product_type == product_type_virtual)
```

```
    {

    if (has_combinations)
```

And replace it on follow:

```
    else if (product_type == product_type_virtual)

    {

    if (false)
```

If your PrestaShop version 1.6.0.8, 1.6.0.9, 1.6.0.11 make also changes below:

In file "your store/js/admin-products.js"

If your PrestaShop version >= 1.6.0.13 make also changes below:

In file "your store/js/admin/products.js"

Look for the lines:

```
$('a[id*="Combinations"]').hide();
$('a[id*="Shipping"]').hide();
```

And replace it on follow:

```
//$('a[id*="Combinations"]').hide();
$('a[id*="Shipping"]').hide();
```

```
1113                $( #virtuat_good ).snuw();
1114    ⊖      });
1115
1116    ⊖      tabs_manager.onLoad('Quantities', function(){
1117              $('.stockForVirtualProduct').hide();
1118    ⊖      });
1119
1120    //        $('a[id*="Combinations"]').hide();
1121
1122          $('a[id*="Shipping"]').hide();
1123
1124    ⊖      tabs_manager.onLoad('Informations', function(){
1125              $('#condition').attr('disabled', true);
1126              $('#condition option[value=refurbished]').remov
1127              $('#condition option[value=used]').removeAttr('
```

After installation, you can add combinations to the virtual products, and add files to them.
